PREMIUM

i. Premium payment mode

Regular premium, choice of yearly, half-yearly, quarterly and monthly.

Inclusion of SPTU upon inception can be paid via credit card. However, SPTU during CS stage is only payable by cash or cheque.

ii. Premium mode factors

Modal premium is determined before annual premium where the annual premium is M times of the Modal premium.

Mode of Modal Premium	M
Annually	1
Half-yearly	2
Quarterly	4
Monthly	12

FLEXIBLE OPTIONS

i. Single Premium Top-Ups (SPTU)

Policyholder age between 30 days attained age and age 70 next birthday can include SPTU at policy inception if 30:15 Illustration Rule failed. Minimum SPTU at inception is RM1,000 and increases in a multiple of RM100. While include SPTU at policy inception due to failing 30:15 Illustration Rule, first policy year Insurance Premium and Balancer need not be fulfilled before SPTU is payable.

A policy owner can make further single premium as investment top-ups subject to the following conditions:

a) Minimum of RM 1,000 each at any time.
b) The current year's and all previous years' Insurance Premium and Balancer have been fulfilled.

ii. Premium Increment

A policy owner can increase the regular Budgeted Premium subject to the following conditions:

a) Increase in premium can take effect from the previous or next Policy Anniversary subject to the constraints below:

Mode of Payment	Minimum Increment (RM)
Annually	240
Half-yearly	120
Quarterly	60
Monthly	20

b) The minimum and maximum sum assured limits will not be recalculated automatically. If at the point of application of premium increment the current sum assured is below the revised minimum limit, the flow of Insurance Premium and Balancer will be adjusted.
c) Any increase in premium will be treated as a new premium for the purpose of allocation to the unit funds.
d) Balancer during in force stage will at least maintain to be 50% of BuP at all time.

Example:

Age Next Birthday: 5 (i.e. SAM rule 60)
At New Business stage:
BuP = RM2,000
IP = $\frac{\text{BuP}}{2}$ = RM1,000
Minimum Basic Sum Assured (BSA) = RM1,000 * SAM = RM 60,000
Purchased BSA = RM 100,000

At in force stage:
If BuP is increased to RM3,000 and BSA continue to be maintained at RM100,000.

BuP split ratio
IP = BSA / SAM = RM100,000 / 60 = RM 1,667
Balancer may be RM 1,333

Hence, not fulfilling Balancer condition of at least 50%.
Thus, system auto fixed IP to be RM1,500 and Balancer to be RM1,500.

iii. Partial Withdrawal

Monies can be withdrawn by selling some of the units at the NAV in one or more of the invested funds subject to the following conditions:

a) The minimum amount for partial withdrawal must equal to RM 1,000.
b) The aggregate value of the remaining units in all funds must be at least RM 1,000.

iv. Fund Switching

A policy owner can sell units in any one fund at the NAV and purchase units in any of the other funds at the NAV at no charge, at any time after the policy has turned in force. The minimum amount sold to purchase units in another unit fund must equal to RM 1,000. More than one switch can be done at one time and this will be considered as a single switch.

v. Changing Premium Apportionment

A policy owner can alter the premium apportionment at any time. After the Company receives the alteration request, the next and all future premiums will be apportioned to the Unit Funds in the new proportions subject to the minimum BuP listed in the table below:

Mode of Payment	Minimum Amount Apportionable to Each Fund (RM)
Annually	12
Half-Yearly	6
Quarterly	3
Monthly	1
