Second Claim Conditions

i. Newly Diagnosed Cancer (Second Primary Cancer)

Newly Diagnosed Cancer (Second Primary Cancer) means the presence of cancerous changes or features and not a progression of the first Cancer, for which a claim was admitted under the Policy.

For avoidance of doubt, the Newly Diagnosed Cancer (Second Primary Cancer) must meet the criteria set out in the definition of Cancer covered in the Policy, and therefore does not apply to any illness which falls outside such definition. In addition, the medical evidence must clearly demonstrate that the Newly Diagnosed Cancer (Second Primary Cancer) meets all the following:

(a) It is not a relapse or re-occurrence or metastasis of the first Cancer which has been paid under the policy; and

(b) It is from different organs or sites from the first Cancer claim

Paired organs refer to those organs with both left and right component (for example breast, kidney, ovary, lungs and testis) and these 2 components of that organ shall be considered as one and the same organ. Irrespective of the histological pattern of the Newly Diagnosed Cancer (Second Primary Cancer), if the claim arises from the same organ or site, it will not be payable.

In assessing eligibility for the Newly Diagnosed Cancer (Second Primary Cancer), medical findings such as imaging, histology, clinical notes and/or other evidence including but not limited to specialist reports or Medical Practitioner's opinion will need to demonstrate that the Newly Diagnosed Cancer (Second Primary Cancer) is not a relapse or re-occurrence or metastasis of any previous Cancer claim which has been admitted under the policy.

ii. Newly Diagnosed Heart Attack (Second Heart Attack)

Newly Diagnosed Heart Attack (Second Heart Attack) means a separate Heart Attack and not a progression of the previous one. Where a benefit in respect of the Heart Attack of Specified Severity has previously been claimed under the Policy, the consultant cardiologist must certify that the Newly Diagnosed Heart Attack (Second Heart Attack) as diagnosed for the subsequent claim is at a different location of the heart from the previous Heart Attack.

Location of the heart includes right atrium, right ventricle, left atrium, anterior wall of left ventricle, posterior wall of left ventricle, anteroseptal wall of left ventricle, lateral wall of left ventricle and inferior wall of left ventricle.

The diagnosis must be supported with fresh evidence based on the criteria set out in the definition of Heart Attack.

iii. Newly Diagnosed Stroke (Second Stroke)

Newly Diagnosed Stroke (Second Stroke) means a separate Stroke and not a progression of the previous one. Where a benefit in respect of the Stroke has previously been claimed under this Policy, the neurologist must certify that the Stroke as diagnosed for the subsequent claim had resulted from infarction or haemorrhage in a different blood vessel; or different carotid artery; or different location in the brain from the previous Stroke.

The diagnosis must be supported with fresh imaging evidence consistent with the diagnosis of the Stroke based on the criteria set out in the definition of Stroke.
