Excess Sum Assured not exceeding RM10,000,000 shall be paid in 3 annual instalments with the first being a lump sum of the Excess Sum Assured or RM2,000,000 whichever is lesser, and the balance of the Excess Sum Assured, will be payable in two equal, annual instalments of maximum RM4,000,000 each.
c) Parts (a) and (b) only applies for TPD occurring prior to the policy anniversary on which the Life Assured attains age 70 next birthday.

Note: Excess Sum Assured = BSA+ASA minus TIV.

5. Additional Sum Assured

a) The Additional Sum Assured payable at death, accidental death, or TPD is:

1% x Min(Current Sum Assured, Initial Sum Assured) x Min(completed policy years at death, accidental death or TPD, 30 years).

Note:
- Initial Sum Assured refers to Basic Sum Assured at policy commencement.
- Current Sum Assured refers to Basic Sum Assured at death, accidental death or TPD.
- Basic Sum Assured will stay level throughout whole policy term, unless policyholder chooses to increase or decrease sum assured.

b) The ASA for child below age 5 next birthday is subject to the lien as per Death Benefit.
c) There are no additional insurance charges for ASA.
d) The Additional Sum Assured is offered to both standard and substandard lives.
e) If IL Critical Illness Plus Assure Rider (U185) is attached, the ASA does not apply to the rider.

Examples (Assuming no child lien for all cases):-

Scenario 1: No change in BSA

Initial Sum Assured = RM500,000. No increase/ decrease in sum assured. Death occurs at 4 years and 3 months.
Total ASA= (1% x RM500,000) x 4 = RM20,000
Total Death Benefit = max(RM500,000 + RM20,000, TIV) = max(RM520,000, TIV)

Scenario 2: Increase in BSA

Initial Sum Assured = RM500,000. Increase in sum assured from RM500,000 to RM650,000 in policy year 2. Death occurs at 2 years and 6 months.
Total ASA = (1% x RM500,000) x 2 = RM10,000
Total Death Benefit = max(RM650,000 + RM10,000, TIV) = max(RM660,000, TIV)

Scenario 3: Decrease in BSA

Initial Sum Assured = RM800,000. Decrease in sum assured from RM800,000 to RM 500,000 in policy year 3. Death occurs at 15 years and 8 months.
Total ASA= (1% x RM500,000) x 15 = RM75,000
Total Death Benefit = max(RM500,000 + RM75,000, TIV) = max(RM575,000, TIV)

Scenario 4: Accidental death claim

Initial Sum Assured = RM700,000. Accidental death (Non-Public Conveyance) occurs at 15 years and 2 months.
Total ASA = (1% x RM700,000) x 15 = RM105,000
Total Accidental Death Benefit = max(BSA + ASA, TIV) + (BSA + ASA)
= max(700,000 + 105,000, TIV) + (700,000 +105,000)
= max(805,000, TIV) + 805,000

If BSA+ASA>TIV, the following will be payable:
Total Accidental Death Benefit = 2 x 805,000 = RM1,610,000

If BSA+ASA<TIV, the following will be payable.
Total Accidental Death Benefit = TIV + RM805,000

Scenario 5: Accidental death claim after TPD claim for BSA > RM10 million

Initial Sum Assured = RM15,000,000. TPD occurs at 10 years and 2 months, TIV = RM2,000,000. Accidental death (Non-Public Conveyance) occurs at 15 years and 5 months.

- TPD claim amount:
  = Min (BSA + ASA – TIV, RM10,000,000)
  = Min (RM15,000,000 + RM1,500,000 – RM2,000,000, RM10,000,000)

= Min (RM14,500,000, RM10,000,000)
= RM10,000,000
This TPD claim amount will be payable in 3 annual instalments with the first being a lump sum of RM2,000,000 and the balance will be payable in two equal, annual instalments of RM4,000,000 each. There will not be any ASA payout in the future as the ASA portion of RM1,500,000 will be advanced first before the BSA in determining the TPD claim amount.
Remaining sum assured
= RM15,000,000 – (RM10,000,000 – RM1,500,000)
= RM15,000,000 – RM8,500,000
= RM6,500,000

- After TPD claim, the COI will be charged on the excess of remaining sum assured over TIV, i.e. RM6,500,000 – RM2,000,000 = RM4,500,000
- Total Accidental Death Benefit = 2 x RM4,500,000 = RM9,000,000

6. Maturity Booster

12% x Basic Sum Assured (BSA), where BSA is the lower of the initial sum assured or any subsequent amendment made to the BSA will be payable upon maturity, provided all premiums due are paid-up-to-date.

7. Maturity Benefit

The Total Investment Value (TIV) less indebtedness will be payable upon maturity, if any. TIV is calculated at NAV at the next Valuation Date.

8. No-lapse Guarantee

There is a 6 years no-lapse guarantee for the first 6 policy years starting from the day the policy is inforce. This means that the policy and its attachable supplementary benefits shall continue to remain inforce even if the TIV becomes zero, subject to the following conditions:

a) Regular premium is payable consistently (Note: for 5-pay, the premium will cease at 5th policy year, it is still qualified for no-lapse guarantee up to 6 years).
b) No premium holiday is allowed.
c) No partial withdrawal is allowed.
d) No reduction or termination of GSR (if any).

When the no-lapse guarantee is in effect, all benefits (after deducting any deficit amount in the TIV) shall be payable upon a valid claim event, given the conditions above are met.

However, the policy will lapse if the TIV becomes zero in any year from the 7th policy year onwards.

Policy Fee and Insurance Charge due after the no-lapse guarantee takes effect will be deducted when
(a) the Budgeted Premium and Great Saver Rider premium (if any) of this Policy is paid; or
(b) the Investment Top-ups is paid
until the Policy Fee and Insurance Charge due are fully paid.

Policy Fee and Insurance Charge due after the no-lapse guarantee takes effect will also be deducted from any benefits payable under this Policy.
