Examples (Assuming no child lien for all cases):-

Scenario 1: No change in BSA

Initial Sum Assured = RM500,000. No increase/ decrease in sum assured. Death occurs at 4 years and 3 months.
Total ASA= (1% x RM500,000) x 4 = RM20,000
Total Death Benefit = RM500,000 + RM20,000 + TIV = RM520,000 + TIV

Scenario 2: Increase in BSA

Initial Sum Assured = RM500,000. Increase in sum assured from RM500,000 to RM650,000 in policy year 2. Death occurs at 2 years and 6 months.
Total ASA = (1% x RM500,000) x 2 = RM10,000
Total Death Benefit = RM650,000 + RM10,000 + TIV = RM660,000 + TIV

Scenario 3: Decrease in BSA

Initial Sum Assured = RM800,000. Decrease in sum assured from RM800,000 to RM500,000 in policy year 3. Death occurs at 15 years and 8 months.
Total ASA= (1% x RM500,000) x 15 = RM75,000
Total Death Benefit = RM500,000 + RM75,000 + TIV = RM575,000 + TIV

Scenario 4: With IL CIBR; Death claim after CI claim

Initial Sum Assured = RM500,000. IL CI Benefit Rider with sum assured of RM500,000 is attached. No increase/ decrease in sum assured. CI occurs at 4 years and 3 months. Death occurs at 10 years and 5 months.

- After CI claim at 4 years and 3 months, there is no longer any Basic Sum Assured on this policy. The ASA of RM20,000* along with TIV will be payable upon death / TPD claim.
  **ASA at 4 years and 3 months = (1% x RM500,000) x 4 = RM20,000*
- Total Death Benefit payable at death = RM20,000 + TIV

Scenario 5: With IL CIBR; Accidental death claim after CI claim

Initial Sum Assured = RM600,000. IL CI Benefit Rider with sum assured of RM600,000 is attached. No increase/ decrease in sum assured. CI occurs at 3 years and 3 months. Accidental Death (Non-Public Conveyance) occurs at 6 years and 5 months.

- After CI claim at 3 years and 3 months, there is no longer any Basic Sum Assured on this policy. The ASA of RM18,000* along with TIV will be payable upon death / TPD claim.
  **ASA at 3 years and 3 months = (1% x RM600,000) x 3 = RM18,000*
- Total Accidental Death Benefit = 2 x (BSA + ASA) + TIV
  = 2 x (0 + 18,000) + TIV
  = 36,000 + TIV

Scenario 6: Accidental death claim

Initial Sum Assured = RM700,000. Accidental death (Non-Public Conveyance) occurs at 50 years and 2 months.
Total ASA = (1% x RM700,000) x 40 = RM280,000
Total Accidental Death Benefit = 2 x (BSA + ASA) + TIV
= 2 x (700,000 + 280,000) + TIV
= 1,960,000 + TIV

Scenario 7: Accidental death claim after TPD claim for BSA > RM10 million

Initial Sum Assured = RM15,000,000. No increase/ decrease in sum assured. TPD occurs at 32 years and 2 months. Accidental death (Non-Public Conveyance) occurs at 40 years and 5 months.

- TPD claim amount:
  = Min (BSA + ASA, RM10,000,000)
  = Min (RM15,000,000 + RM4,800,000, RM10,000,000)
  = Min (RM19,800,000, RM10,000,000)
  = RM10,000,000
  This TPD claim amount will be payable in 3 annual instalments with the first being a lump sum of RM2,000,000 and the balance will be payable in two equal, annual instalments of RM4,000,000 each. There will not be any ASA payout in the future as the ASA portion of RM4,800,000 will be advanced first before the BSA in determining the TPD claim amount.
  Remaining sum assured
  = RM15,000,000 – (RM10,000,000 – RM4,800,000)
  = RM15,000,000 – RM5,200,000
  = RM9,800,000
- After TPD claim, the COI will be charged on the remaining sum assured of RM9,800,000.
- Total Accidental Death Benefit = 2 x RM9,800,000 + TIV = RM19,600,000 + TIV

6. Booster Reward

12% x Basic Sum Assured (BSA), where BSA is the lower of the initial sum assured or any subsequent amendment made to the BSA will be credited into the TIV account at the policy anniversary of age 70 years next birthday or at the end of the 30th policy year, whichever is later, provided the policy is inforce and all premiums due are paid-up-to-date.

Notes (for internal reference only):

a) If the policyholder only pays all the premiums due AFTER the Booster Reward pay out date, he/she will still be entitled to the Booster Reward (calculated at Net Asset Value on the next valuation date) which will be credited in the TIV account on the day all the premiums due are paid.

b) The policyholder is still entitled to the Booster Reward after reinstatement of the policy, provided the policy is in force and all premiums due are paid-up-to-date.

7. Maturity Benefit

The Total Investment Value (TIV) less indebtedness will be payable upon maturity; if any. TIV is calculated at NAV at the next Valuation Date.

8. No-lapse Guarantee

There is a 6 years no-lapse guarantee for the first 6 policy years starting from the day the policy is inforce. This means that the policy and its attachable supplementary benefits shall continue to remain inforce even if the TIV becomes zero, subject to the following conditions:

a) Regular premium is payable consistently.
b) No premium holiday is allowed.
c) No partial withdrawal is allowed.
d) No reduction or termination of GSR (if any).

When the no-lapse guarantee is in effect, all benefits (after deducting any deficit amount in the TIV) shall be payable upon a valid claim event, given the conditions above are met.

However, the policy will lapse if the TIV becomes zero in any year from the 7th policy year onwards.

Policy Fee and Insurance Charge due after the no-lapse guarantee takes effect will be deducted when
(a) the Budgeted Premium and Great Saver Rider premium (if any) of this Policy is paid; or
(b) the Investment Top-ups is paid
until the Policy Fee and Insurance Charge due are fully paid.

Policy Fee and Insurance Charge due after the no-lapse guarantee takes effect will also be deducted from any benefits payable under this Policy.
